i. Importing Videos

There are three ways to add online videos to download:

- a. Highlight the URL of the video, and then drag it to the app.
- b. Drag-n-drop the thumbnail image of the video to the app's main interface.
- c. Add the URLs.
 1. You need to find the video that you want to download on the website.
 2. Copy the URL of that video.

3. You need to click  first, and then paste the video's URL into the box underneath, or you can just highlight the URL and then drag it into the box underneath.

Tip:

1. That "Save To" can help you set the path to you want to save the video.
2. After download finished, you can find locate video by clicking .

4. Click "OK" to confirm settings.

ii. Download Settings

After you pasted the URLs, the app starts to retrieve data of those videos. When the process is completed, on the main interface thumbnails of those videos will show up, and adjacent to each of which there are two tabs - Format and Quality. The former one gives you the opportunity to choose a format in which the video to download; the latter one makes choosing the quality of the video to download possible.

iii. Starting Downloads

After linking finished, you can click on the litter arrow on a given added video to start downloading.

Or you can highlight the added video and click  to start the process.

There are also two other function buttons there - “Pause” and “Stop”, both of which also control process respectively.

iv. Removing Videos

If you need to delete a given from the list, you just need to highlight it and click  . If you need to delete multiple videos, you can highlight them all and then click the same button.
